Life expectancy at birth	55.1 years

Yellow: LIGHT FOR THE WORLD's priority province where we aim to implement a comprehensive programme covering all of our intervention areas.

Orange: Partner provinces, in which we only support one or two intervention areas.

Green: The province to which LIGHT FOR THE WORLD may expand within the duration of this Country Strategy.

Grey: The capital of Mozambique, in which LIGHT FOR THE WORLD is active in advocacy and through support to national initiatives.

Introduction

Despite the fast growth of the economy over the last 15 years, Mozambique continues to be one of the poorest countries in the world with 46% of Mozambicans living below the poverty line. To promote the rights of persons with disabilities, the country ratified the UN Convention on the Rights of Persons with Disabilities (CRPD) in October 2010. The Government of Mozambique has already developed its second National Action Plan on Disability (2012-2019), promoting a multisectoral approach towards the promotion and inclusion of persons with disabilities. Community Based Rehabilitation (CBR) is recognised today as an effective strategy for implementing the CRPD in local communities. During the period covered by the previous Country Strategy (2012-2015), LIGHT FOR THE WORLD was able to expand and further develop CBR programmes in

¹ Source: Human Development Report 2015, UNDP

cooperation with the Provincial Directorate of Gender, Child and Social Action of Sofala. The present strategy (2016-2020) aims to further strengthen our achievements in order to work towards an inclusive society in which persons with disabilities fully enjoy their rights.

Overall strategy of LIGHT FOR THE WORLD

The **overall objective** of LIGHT FOR THE WORLD is to contribute to an inclusive society in Mozambique, where persons with disabilities are fully included and empowered in order to sustainably reduce inequality and poverty. To achieve this objective, the programmatic approach is based on our Theory of Change:

At the level of the individual, LIGHT FOR THE WORLD aims for accessible, sustainable and qualitative services that address the needs of persons with disabilities so they can fully exercise their rights.

At community level, we work towards greater participation and visibility of persons with disabilities in all areas of public life, in decision-making processes and in development programmes. LIGHT FOR THE WORLD works with Persons with Disabilities’ Organisations (DPOs) - directly or indirectly - for awareness-raising and social mobilisation on the rights of persons with disabilities.

At national level, LIGHT FOR THE WORLD's objective is a structural change through which national ministries take into account and ensure the participation of persons with disabilities in the development, monitoring and implementation of policies, programmes and services. LIGHT FOR THE WORLD supports the development and implementation of national policies and programmes in its intervention areas and these strategic documents guide the implementation of our programme. The role of LIGHT FOR THE WORLD is to be a convener, to bring together and encourage collaboration between relevant stakeholders to work towards an inclusive society.

At regional (Africa) and international level, LIGHT FOR THE WORLD is working to establish a reciprocal relationship of influence between persons with disabilities in Mozambique and the international institutional frameworks and actors.

Our strategy for the promotion of an inclusive society in Mozambique, 2016-2020

EYE HEALTH

Our vision for eye care in Mozambique is to fully integrate eye health services into the government system.

Eye care services in Mozambique are almost exclusively being provided by the Ministry of Health. The sector has grown immensely over the past years, particularly in regards to the number of allied eye health personnel and decentralisation of services. However, services are still low in terms of quantity (Cataract surgical rate of 340 in 2015) and quality (as shown in recent population based studies)². The main obstacles to the development of eye health services are shortage of human resources, lack of consumables and equipment, weak awareness and access, especially amongst the rural population and still the lack of sub-specialisation and thus comprehensiveness of services provided. LIGHT FOR THE WORLD contributes to the development of comprehensive eye health services based on the National Eye Care Plan (2015-2019) of the Ministry of Health, as well as the Vision 2020 - The Right to Sight and the WHO Global Action Plan for Universal Eye Health. We aim for the following results:

Specific objective 1: Contribute to the development of comprehensive and quality eye health services by supporting the implementation of Ministry of Health's National Eye Health strategy.

² Rapid Assessment of Avoidable Blindness surveys in Nampula (2011), Sofala (2013) and Inhambane (2016)

Expected Result 1.1: Human resources for eye health are quantitatively and qualitatively strengthened.

Main actions

- Support the **training of Mozambican ophthalmologists** in terms of **quality and quantity**, with specific emphasis on surgical capacities and allocation of ophthalmologists in underserved regions
- Support the **quality of training of ophthalmic technicians**, with particular emphasis on the need of underserved regions, as well as **advocate for a career progression** for ophthalmic technicians in order to ensure sustainability of the cadre
- Support **continuous development of eye health staff** in order to strengthen the eye care programmes supported by LIGHT FOR THE WORLD, with specific emphasis on refraction, surgical outcome quality and equipment maintenance
- Support for the **continuous training of other health professionals** (nurses), primary health volunteers (activists and community health workers) and community actors (teachers) in primary eye health care

Expected Result 1.2: Comprehensive³ and quality eye health services are accessible to all, particularly rural and vulnerable populations and especially girls and women in Sofala, Cabo Delgado, Niassa, Tete and Zambezia provinces.

Main actions:

- Support the provision of **comprehensive services** accessible to the rural population through provincial eye care programmes, with specific emphasis on **priority conditions**: cataract, trachoma, glaucoma, uncorrected refractive errors (URE) and diabetic retinopathy
- Contribute to the **elimination of blinding trachoma** as a public health problem in the provinces of Sofala and Cabo Delgado
- Support efforts to improve the **quality of services** provided through the provincial eye care programmes, with specific emphasis on surgical outcome quality and medication, drugs and equipment for eye care services
- Support the **Eye Department of the Central Hospital of Beira** to become a **national centre of excellence** in management and quality assurance, and a quality **training centre** for mid-level and postgraduate training in ophthalmology
- Development of a **pilot programme on refractive services** in Sofala (and Tete) provinces, with specific emphasis on access to ready-made and tailor-made spectacles in rural areas and pilot school eye health programmes
- Improve **access to services** for vulnerable groups, with particular emphasis on girls and women, as well as the rural population, through gender-targeted mobilisation and improved referral from CBR projects

.....
3 Rapid Assessment of Avoidable Blindness surveys in Nampula (2011), Sofala (2013) and Inhambane (2016)

Celina A. receives an eye patch after cataract surgery at an ophthalmic outreach in Sofala.

Expected result 1.3: A strong eye health programme is more sustainable through increased ownership and leadership of the Ministry of Health.

Main actions:

- Support the National Ophthalmology Programme in the overall implementation and monitoring of the **National Vision 2020 Plan (2015-2019)**, including development of national quality policies and analysis of eye care data and elaboration of the next National Eye Care Plan (2020 and beyond)
- Support the **decentralisation of the Ophthalmology Programme** through targeted building of management capacities at national, provincial and district level
- Advocacy for **increased allocation of government budget** to eye care programmes, with a focus on Human Resources for Eye Health (HReH), medication, consumables and equipment
- Support the **coordination and networking activities** between stakeholders involved in the field of eye health

INCLUSIVE EDUCATION

Our vision is to build up a multi-stakeholder pilot programme on inclusive education in Sofala.

It is estimated that only 24,600 out of an estimated 2 million girls and boys with disabilities are in primary and secondary school in Mozambique. The need to include children with disabilities in education is crucial, if education for all is to be achieved. The National Action Plan on Disability II 2012-2019 (PNAD II) clearly calls for inclusive education as a strategy for education of persons with disabilities at all levels and sub-systems of the education system, both for children, youth and adults (adult literacy). Also, the Strategic Plan of the Ministry of Education and Human Development 2012-2016 expresses the government's commitment to the concept of inclusion. However, there is a huge shortage of inclusive schools, trained teachers and adequate teaching and learning material. LIGHT FOR THE WORLD has been supporting pilot projects in Sofala with private education providers and in public schools through the work of our CBR partners. Our priority in the coming years will be to consolidate and to further develop this experience gained by fostering partnerships across actors and districts. The ultimate goal is a quality education for all learners, regardless of their abilities. LIGHT FOR THE WORLD supports this goal by focusing on the right to education for children with disabilities. We are convinced that the CBR approach is a key factor to make inclusive education the reality in Mozambique. Our strategy aims to achieve three main results:

Specific objective 2: Contribute to the development of the education system so that it provides quality education for all learners, regardless of their capacities, with a strong emphasis on the right to education for children with disabilities.

Expected Result 2.1: Children and youth with disabilities in CBR and inclusive education project areas in Sofala are enrolled and retained in inclusive school settings at community/local level.

Main actions

- Support CBR programmes and NGOs to **identify and accompany children with disabilities** to nearby schools
- Support selected government and NGO-led inclusive schools in **adopting inclusive teaching methodologies**
- **Monitor enrolment, retention and progression** of children with disabilities in supported inclusive schools

Expected Result 2.2: Local capacity on inclusive education strengthened to provide an adequate inclusive learning environment in Sofala and Manica province.

Main actions

- Development of a **centre of expertise on inclusive education** at the teacher training centre of the Mozambican NGO ADPP in Nhamatanda (Sofala) and support for the teacher training centre in Chimoio (Manica) already engaged in inclusive education
- In partnership with the Provincial Education Authority (DPEDH) Sofala, set up a **support network for inclusive** (government and NGO-led) **schools** in the region through the resource centre at ADPP
- Support the Provincial Education Authority (DPEDH) Sofala in **strengthening inclusive/special education knowledge** in selected government special school(s) and teacher training centre(s)

Expected Result 2.3: The policy and legal framework as well as the general education environment are strengthened and favourable to inclusive education at Sofala level and at national level

Main actions:

- Support the Provincial Education Authority (DPEDH) Sofala in **systemisation of efforts towards inclusive education**, including capacity building of their own staff, establishment of monitoring and evaluation of inclusive education actions in the region, promoting mutual learning and exchange between inclusive education actors and documentation and dissemination of good practices
- Influence **education policy formulation processes** at national level by providing technical support to selected education stakeholder(s), such as the Mozambican Movement Education for All (MEPT), in strategic partnership(s)

LIVELIHOOD

Our vision is to use the programme on mainstreaming technical vocational education and training (TVET) centres as a means of building expertise in livelihood and mainstreaming, in order to multiply this approach with future livelihood programmes.

Employment rates of persons with disabilities are far below those of the overall population. The National Disability Action Plan of Mozambique (PNAD II) itself, speaks of 39% unemployment among persons with disabilities compared to 9% among the non-disabled population. The Ministry of Work, Employment and Social Security recently approved the Employability Policy clearly outlining the importance of facilitating access to education, training and employment for persons with (physical) disabilities and the need to fight against their exclusion and stigmatisation. LIGHT FOR THE WORLD aims to promote a wide range of livelihood opportunities for persons with disabilities: income-generating activities; savings and loans groups; work in the home; individual production; self-employment and salaried employment in a public or private organisation or firm. We follow a comprehensive mainstreaming approach that leads to inclusive and accessible technical, vocational and skills training programmes, job placement and financial services. We use CBR as a tool for achieving decent livelihoods for persons with disabilities. We aim for the following results:

Specific objective 3: Contribute to the development of accessible technical, vocational and skills training programmes increasing livelihood opportunities for persons with disabilities in Sofala province.

Expected Result 3.1: Access to vocational training for young adults with all types of disabilities in central Sofala is significantly improved.

Main actions

- Support **TVET centres to become inclusive for youth with disabilities** through improved accessibility, trained and sensitized trainers, staff and trainees, as well as by providing essential learning and teaching materials and assistive devices
- Ensure **access of youth with disabilities to inclusive TVET centres** through identification, preparation and mentoring by CBR programmes, inclusive education programmes and DPOs

Expected Result 3.2: Employability of persons with disabilities in different settings including self-employment, employment, income-generating activities, savings groups, and home-based work is improved in Sofala province.

Main actions:

- **Strengthen employability** of youth and adults with disabilities in government and private companies through targeted advocacy and awareness raising

- **Promote self-employment and access to micro-finance** by partnering with mainstream economic empowerment programmes
- Improve livelihood initiatives within CBR programmes in terms of scope and quality, taking into account **local solutions in the community** such as home-based work, savings groups and small income-generating activities

Community Based Rehabilitation

Our vision is to embed CBR in government structures.

The CBR is promoted by the World Health Organization (WHO), the International Labour Organization (ILO); the United Nations Educational, Scientific and Cultural Organization (UNESCO); and the International Disability and Development Consortium (IDDC) as the starting point for the comprehensive inclusion of persons with disabilities. Over the past five years, LIGHT FOR THE WORLD has been developing a strategic partnership with the Provincial Directorate of Gender, Child and Social Action in Sofala to collaboratively promote this inclusive community approach in the districts of Sofala. The National Strategy for Basic Social Security for 2016-2024 aims to promote actions which lead to poverty and vulnerability reduction, ensuring that all Mozambicans benefit from economic growth. Persons with disabilities are among the key target groups for the Ministry of Gender, Child and Social Action (MGCAS), responsible for implementing the Basic Social Security Strategy (ENSSB). In the context of the present strategy 2016-2020, LIGHT FOR THE WORLD aims to contribute to the implementation of the ENSSB by supporting the adoption of CBR as an effective implementation strategy at national level. We will continue to further develop our CBR programmes in Sofala, while piloting integrated CBR programmes within the social protection programmes of MGCAS. We will aim for the following results:

Specific objective 4: Contribute to the integral inclusion of people with disabilities at grassroots level through the development and implementation of a government led national CBR strategy and programme.

Expected Result 4.1: A national CBR programme is functional in selected districts with support from LIGHT FOR THE WORLD.

Main actions

- Strengthen the **technical capacities of MGCAS** in the area of CBR and inclusive development with particular focus on programme design, implementation skills, as well as monitoring, evaluation and systematisation of learning in the pilot areas

- Support the establishment of **pilot government CBR programmes** ensuring effective identification, family and community sensitisation and a functional multi-sectoral coordination to ensure **effective access to services** for persons with disabilities
- Ensure the comprehensive inclusion of people with disabilities in the **social protection programmes** of MGCAS

Expected Result 4.2: Local capacities strengthened to implement comprehensive CBR programmes.

Main actions:

- Strengthen existing CBR programmes to become **resource organisations for training and innovation** (“implementation lab”)
- Support the **basic and continuous training** of social workers, CBR workers, supervisors and managers, as well as relevant district government staff for the implementation of CBR
- Ensure learning and exchange between CBR projects, CBR trainers and government officials to promote **knowledge management and quality improvement** of both programmes and training

Expected Result 4.3: Quality and sustainability of local CBR programmes has improved.

Main actions:

- Support CBR partners in developing **financial sustainability strategies** such as income-generation through providing training, local fundraising and sustainable phase-out of geographic areas
- Strengthen CBR partners’ capacities to **network and cooperate with government and NGO mainstream programmes** in their area, with particular focus on access to social protection schemes, access to livelihood and economic empowerment initiatives, as well as synergies with other programmes supported by LIGHT FOR THE WORLD
- **Strengthen** the role of **DPOs** in CBR

Expected Result 4.4: Sport for persons with disabilities has contributed to social empowerment and inclusion of persons with disabilities in Sofala and Manica.

Main actions:

- Promote the use of sports for persons with disabilities within CBR and inclusive education programmes for **social empowerment, inclusion and rehabilitation** of disabled youth
- Support Disabled Sports Partners in developing **sustainability strategies** through fundraising and partnership development

RIGHTS

Our vision is an empowered DPO and disability movement in Sofala province, as well as LIGHT FOR THE WORLD being a competent and important player providing support for disability mainstreaming.

The current legal environment is favourable to the promotion of the rights of persons with disabilities. The UN Convention on the Rights of Persons with Disabilities (CRPD), the National Disability Action Plan of Mozambique 2012-2019 (PNAD II) and the 2030 Agenda for Sustainable Development – which builds on the core principle of “leaving no one behind” – are important instruments for the inclusion of persons with disabilities. Following a “twin-track approach”, LIGHT FOR THE WORLD aims to strengthen the advocacy capacities of DPOs, as well as to promote inclusive development by promoting change processes within existing development actors, with the aim of making their programmes accessible for and inclusive of persons with disabilities. We will continue to and increasingly engage as an advisor, convener and facilitator of learning processes, to both the disability movement and to general development actors, with the aim of contributing to the effective realisation of the rights of persons with disabilities and their greater participation in development and policy processes.

Our programme aims at the following results:

Specific objective 5: Contribute to the implementation of the CRPD ensuring the participation of people with disabilities in all areas of life and development programmes.

Expected Result 5.1: DPOs and their umbrella bodies have the capacity to actively contribute and engage together with development actors and government to implement their rights, with a clear focus on Sofala province.

Main actions

- Strengthen the **advocacy capacities of DPOs and their umbrella bodies** in Sofala
- Promote partnerships between DPOs and their umbrella bodies with other actors of the civil society and government authorities for **joint advocacy activities regarding the implementation of the legal framework** in favour of persons with disabilities
- Strengthen the **role of DPOs in CBR** programmes

Expected Result 5.2: Initiatives to monitor disability rights at national level are supported.

Main actions

- Support the DPO umbrella body at national level to monitor and **report on the situation of persons with disabilities**, making use of human rights monitoring processes to advance disability rights in the country

- Engage with **Human Rights and Development Advocacy movements** at national level ensuring that disability aspects are taken into account (disability mainstreaming)

Expected Result 5.3: Government, international and national mainstream-development organisations and their programmes are accessible to and inclusive of persons with disabilities.

Main actions

- Develop a **Mozambican Disability Inclusion Lab** within the Country Office, establishing the local capacities needed to technically support different stakeholders in inclusive development
- Support the **design and monitoring of inclusive programmes**, as well as **inclusion of persons with disabilities into existing development programmes** of governmental and civil society actors, in line with the CRPD and the 2030 Agenda for Sustainable Development (wherever possible, ensuring the **involvement of DPOs** in the process of inclusive development)

Expected Result 5.4: Multi-stakeholder pilot programme on inclusive development implemented in Búzi district.

Main actions:

- Promote multi-sectoral cooperation, coordination and joint learning of civil society and government development actors on the **inclusion of persons with disabilities in all of their programmes**
- Support **awareness raising, capacity development** of development actors in **disability mainstreaming** and **empowerment** of persons with disabilities across a multi-stakeholder programme

Cross-cutting themes: Child Protection, Gender and HIV/AIDS

LIGHT FOR THE WORLD puts particular emphasis on child protection and gender mainstreaming. HIV/AIDS is included as a cross-cutting theme because it is widely prevalent in Mozambique. We plan to implement the following specific actions in these areas:

- Strengthen **internal know-how** on gender and child protection:
 - **Continuous staff training** on child protection and gender mainstreaming, taking the LIGHT FOR THE WORLD policies as a basis
 - Establish **focal points** at Country Office level to ensure the capitalisation and transfer of internal thematic information
 - Include these topics more strongly in our **monitoring and evaluation** activities
- Set up **pilot initiatives** to experiment how these cross-cutting issues can be integrated in LIGHT FOR THE WORLD project portfolio in Mozambique:
 - Partnering with **specialised child protection and gender organisations** for mutual learning
 - **Training** of partners in gender and child protection
 - Conduct **gender assessment** of selected programmes to identify gaps and future actions
- Develop an **internal workplace policy on HIV and AIDS** for the Country Office

RESOURCE MOBILISATION AND COMMUNICATION

LIGHT FOR THE WORLD is very fortunate to enjoy generous support from individual donors as well as multiple institutional partners. At the time of going to print, the main institutional partners supporting our work in Mozambique are the Medicor Foundation, INVICTA Foundation, Queen Elizabeth Diamond Jubilee Trust, RTI and the European Union. In 2016 and 2017 we also received generous support from Souter Charitable Trust, Hager Foundation and Eva Mayr-Stihl Foundation. Over the next few years, the Country Office will play an increasingly important role in developing institutional partnerships and consortia at local level as well as the management of co-financed projects. For this purpose, particular attention will be paid to capacity development and the strengthening of systems in the Country Office as well as capacity development of partners in the diversification of their technical and financial partners.

Communication, Visibility and Branding

LIGHT FOR THE WORLD's communications and fundraising are based on a human rights approach, ensuring respect for the individual in the use of images and stories. Our visibility is based on our actions and in internal and external communication we credit our operational partners for their work.

Specific objective 6: LIGHT FOR THE WORLD has a clear brand and strengthened visibility in Mozambique aiming at increasing the impact of its actions, particularly for advocacy, awareness and the mobilization of resources.

Expected Result 6.1: Shared experiences of LIGHT FOR THE WORLD Mozambique contribute to an increase in our visibility and resources at national and international level.

Main actions:

- Documentation and dissemination of lessons learned, good practices and success stories
- Facilitate international media visits to LIGHT FOR THE WORLD projects in Mozambique

Expected Result 6.2: The visibility of the actions of LIGHT FOR THE WORLD and its partners is increased at national level in Mozambique.

Main actions:

- Regular media coverage of the activities of LIGHT FOR THE WORLD and its partners
- Facilitate national press visits to projects supported by LIGHT FOR THE WORLD
- Set up relevant communication tools to increase visibility of LIGHT FOR THE WORLD

Expected Result 6.3: Capabilities and contributions of persons with disabilities are promoted leading to a change in attitude and behaviour in society, with a focus on Sofala.

Main actions:

- Use relevant **international days and campaigns** (World Disability Day, World Sight Day, Global Action Week on Education, etc.) to inform and raise awareness
- Strengthen the **technical capacity of operational partners in communication** (including the design and dissemination of communication media), advocacy and social mobilisation
- Engage with the **local media** for disability-sensitive and disability-focused information for the public

Construction work at the Central Hospital Beira. The new building will provide more space to treat patients as well as offering training for eye care specialists.

.....

IMPLEMENTATION PRINCIPLES & STRUCTURE

In all our areas of work, we strive to achieve the best results and a high impact. Various principles will guide our actions, including:

- **Partner empowerment**
LIGHT FOR THE WORLD is dedicated to empowering its partners, contributing to their institutional development beyond the support to their programmes.
- **Evidence and Monitoring**
The present Country Strategy is accompanied by a Monitoring and Evaluation Framework, which will allow the results to be measured. At the end of this Country Strategy, an evaluation oriented towards impact will be conducted and its findings taken into account in the following Country Strategy.
- **Exchange and Knowledge Management**
Special attention will be paid on exchange, be it between partners in Mozambique, or between LIGHT FOR THE WORLD colleagues at national and international level. We will invest in documentation of best practices, challenges, and lessons learned.

- **Accountability and Transparency**

Our financial reporting systems, and key performance indicators will be strengthened, both at national and international level. Special attention will be given to promoting capacities of the Country Office and partners in anti-corruption measures, including the strengthening of internal control and reporting systems of partner organisations.

The role and responsibilities of the Country Office of LIGHT FOR THE WORLD in Mozambique are the following:

- Planning, implementation and monitoring of the Country Strategy and annual work plans
- Preparation for the approval and monitoring and evaluation of projects in the context of the Country Strategy
- Networking and collaboration with strategic or institutional partners
- Ensuring visibility of LIGHT FOR THE WORLD in Mozambique
- Targeted capacity development of partners
- Knowledge management and collection of strategic information and policies;
- Logistical support (facilitation of exchanges, visits...) and procurement processes
- Reporting (technical, financial, statistics) and evaluation including audit.
- Representing LIGHT FOR THE WORLD in Mozambique and the programme of Mozambique within LIGHT FOR THE WORLD International
